**Upcoming Special Issue (March - 2019)**

## “Entrepreneurship: Investment and Innovation”

The digital era requires business people to learn continuously about business and/or IT. The turbulence of the environment demands companies to be competitive and have a business performance that is above average.

Companies need to be able to have an innovation in each aspect continuously and sustainably. Therefore, HR becomes a strategic resources for the organizations. An excellent HR is the one that is capable to meet the internal and external environment demands in a long term.

This call aims to gather submissions dealing with investment and innovation in entrepreneurship for Productive Capacity-building and Sustainable Development. The editors are seeking conceptual, theoretical, and empirical (both quantitative and qualitative) papers devoted to investment, calculating the payback period of investment projects, and studying the role of innovations in enterprise development. Authors from different disciplines, such as management, education, social sciences and other disciplines related to entrepreneurship education development issue are invited to submit their papers.

**Journal of Entrepreneurship Education** is looking to publish manuscripts that explore the link between Investment, Innovation and entrepreneurship education from a wide range of theoretical, methodological and disciplinary perspectives. Submissions for the Special Issue could relate, but are not limited, to the following topics:

- Instructional methods for demonstrating start-up financing opportunities.
- Case studies regarding angel investments.
- Strategies in financial bootstrapping methods.
- Review of grant writing and funding towards non for profit enterprises.
- Exploration of emerging markets involving Foreign Direct investments.
- Introduction and overview of educational workshops designed for individual entrepreneurs seeking funding.
- Emerging topics in involving entrepreneurial financing and wealth creation.
